Ways To Earn Income

Ambassador Generational Bonuses

Qualified Ambassadors and above can earn an additional 2% generational bonus on the total points of five generations of Ambassadors deep, starting with their own personal infinity points. Infinity points are defined as all points in an Ambassador's Organization (excluding personal points), an infinite number of levels deep, down to the next qualified Ambassador. This means that you can earn 2% on your entire Organization, potentially well beyond 10 levels.

Example 1: This Ambassador has 24,500 personal infinity points because none of the points are in another Ambassador's Organization. This Ambassador would earn 2% on his entire personal infinity points of 24,500 or \$490.

Example 2: Ambassador A has 21,500 personal infinity points because 22,000 points are in Ambassador B's Organization. Ambassador A would earn 2% on his personal infinity points (Generation 1) or \$430. Ambassador A would not earn on Ambassador B's 22,000 points because Ambassador B is a second generation Ambassador to Ambassador A. Ambassador A would have to be an Ambassador I in order to pick up her second generation of Ambassadors. When that happens, Ambassador A will then get 2% of her 21,500 personal infinity points and 2% of Ambassador B's 22,000 infinity points as a first generation Ambassador, resulting in a monthly Ambassador Generational Bonus of \$870.

Ways To Earn Income

To qualify as an Ambassador I or above, you must have one or more personally enrolled Ambassador Legs in addition to the volume requirement. Personally enrolled Ambassador Legs means as an Ambassador, you can count other Ambassadors in your Organization as long as they have an enrollment linkage upline to one of your personally enrolled MEs.

Example:

In this example, Ambassador A enrolled the Director II; the Director II enrolled the Director; and the Director enrolled the Ambassador. Ambassador A can count Ambassador B as one of his Ambassadors needed to get to Ambassador I because it is in Ambassador A enrollment genealogy. In other words, Ambassador A and Ambassador B are linked through levels of enrollments.
